EDUCATION

- **Vellore Institute of Technology (VIT Bhopal)** Bhopal, MP
• *B.Tech in Computer Science and Engineering*

SKILLS

- **Programming Languages:** C++, Java, Python, JavaScript, SQL
- **Backend Technologies:** Spring Boot, Hibernate, REST APIs, Microservices, Node.js, Express.js, JWT, OAuth2
- **Frontend Technologies:** React.js, Next.js, Redux, HTML, JavaScript, Tailwind CSS
- **Databases:** MySQL, PostgreSQL, MongoDB
- **DevOps & Tools:** Docker, CI/CD, Git, GitHub, AWS, Postman
- **Core Concepts:** Data Structures & Algorithms, OOP, System Design

EXPERIENCE

- **AI Life Bot** Onsite
• *Full Stack Developer* May 2024 – Present
 - Designed and developed scalable full-stack applications using Node.js, Express.js, React.js, and Next.js.
 - Handled end-to-end development for government and enterprise-grade applications.
 - Implemented RESTful APIs, authentication, authorization, and workflow-driven systems.

PROJECTS

- **Grievance Management System — CGMSC** AI Life Bot
• *Full Stack Developer*
 - Designed and implemented the complete full-stack Grievance Management System for Chhattisgarh Medical Services Corporation (CGMSC).
 - Architected and developed the entire backend using layered architecture (Controller, Service, Repository).
 - Developed REST APIs for grievance registration, assignment, review, escalation, resolution, and closure.
 - Implemented role-based access control (RBAC) for citizens, officers, supervisors, and administrators.
 - Integrated frontend with backend APIs using secure authentication and workflow-based UI behavior.
- **YouTube Tools Web Application** Self Project
• *Full Stack Developer*
 - Built a full-stack YouTube utility platform using Java, Spring Boot, and modern frontend technologies.
 - Implemented features such as video search, thumbnail downloader, and productivity tools.
 - Optimized backend APIs achieving 5–10% performance improvement.
 - GitHub Repository — [Live Demo](#)
- **Phone Number Tracking System** Self Project
• *Python Developer*
 - Developed a Python-based phone number tracking system using Phonenumbers and OpenCage API.
 - Implemented carrier detection, region identification, and map visualization.
 - GitHub Repository

ACHIEVEMENTS

- Solved 700+ DSA problems across GeeksforGeeks, Coding Ninjas, and LeetCode.
- Completed 100 Days of Code challenge.
- Built and deployed multiple real-world full-stack and backend projects.
